Experienced Software Engineer skilled in developing robust solutions throughout the software development lifecycle. Proficient in micro-services architecture, CQRS pattern, and API-first approaches, with a keen focus on enhancing performance and scalability. A collaborative team player with a commitment to mentoring, continuous learning, and staying current with industry trends, I bring a passion for innovation and a track record of delivering results in dynamic environments.

SKILLS

Technical Skills: ReactJS (17.0.0), Angular (7 & 16) JavaScript/TypeScript, HTML5, CSS3, Java 8, Spring Boot, Scala, Python 3, Kafka, CQL, PostgreSQL 9, PHP, Laravel, LDAP, MongoDB.

Soft Skills: Leadership, Problem-Solving, Communication, Time Management

Language Skills: Fluent in English and Urdu

WORK EXPERIENCE

Upstart Commerce — **Islamabad, Pakistan**
Senior Software Engineer — *January 2023–Present*

Emumba Private Limited — **Islamabad, Pakistan**
Software Engineer — *February 2021–January 2023*

AuditXprt Technologies (Pvt) Ltd. — **Islamabad, Pakistan**
Associate Software Engineer — *June 2020–February 2021*

Untangle Solutions — **Rawalpindi, Pakistan**
Internee — *June 2017–August 2017*

EDUCATION

National University of Computer and Emerging Sciences — **Islamabad, Pakistan**
Bachelor of Science in Computer Science — *February 2021*
Electives: *Java EE, Data Mining, Digital Image Processing, Natural Language Processing, Software for Mobile Devices, Web Programming*

CERTIFICATIONS

WORK SUMMARY

Upstart Commerce **Islamabad, Pakistan**
Senior Software Engineer *January 2023 – Present*

- Worked on the micro-services architecture to build headless backend systems for e-commerce solutions.
- Implemented CQRS pattern to treat retrieving and changing data differently for better performance and scalability.
- For achieving an API-first approach, I used OpenAPI so that code and documentation of the REST APIs are automatically generated.
- Worked on Kafka topics and queues for asynchronous data communication between micro-services.
- Worked on error logging in micro-services and used Google Cloud Logs for easy debugging.
- Read about best REST practices and implement them in our current micro-services.
- Read about hexagonal architecture and converted our local micro-services onto hexagonal architecture.
- Implemented OpenSearch(Elastic Search) in our current micro-services to make data searching and filtering faster and more efficient for customer usage.
- Mentored junior developers and did their code reviews to ensure code quality and optimization.
- Working on agile methodology mainly on sprints and daily stand-ups to achieve pod goals.
- Working on the latest technologies like Cassandra and PostgreSQL.
- Did the technical documentation of the features I worked on so that the team can easily understand them.
- Continuously doing courses/certifications on Udemy to keep myself technically updated.

Emumba Private Limited **Islamabad, Pakistan**
Software Engineer *February 2021 – January 2023*

- Created complex applications for our clients using ReactJS with TypeScript.
- Converted the whole project from monolithic architecture to mono-repo architecture using yarn workspaces.
- Worked on multiple projects with different architectural designs.
- Wrote unit tests in ReactJS using JEST and React Testing Library to ensure bug-free code.
- Traced vulnerabilities while doing manual stress testing and fixed them.
- Implemented Redux store to avoid handling the usage of multiple Reducers.
- Did research on multiple enhancements and updated our code with the researched changes.
- Worked in Agile methodologies mainly on sprints and achieving goals like short-term KPIs and long-term KPIs.
- Worked with remote teams to achieve excellence and high productivity.
- Worked with multiple international clients.
- Researched a product-level requirement to come up with the best choice acceptable to both our client and my team members.
- Worked on AWS and GitHub to continuously synchronize the code with a highly dynamic team.
- Being a part of the summer internship team, I was responsible for the mentorship of the internees.
- Did code reviews of other team members daily to ensure code quality and optimization.
- Worked on Open-Source tasks to enhance my skillset as an engineer.

AuditXprt Technologies (Pvt) Ltd. **Islamabad, Pakistan**
Associate Software Engineer *June 2020 – February 2021*

- Implemented Single Sign-On in multiple products to reduce user registration time and complexity.
- Implemented asynchronous queues in our product to automate multiple tasks.
- Pioneer developer in the product that we built for Barclays.
- Continuously engaged with clients to optimize the best working experience.
- Did an analysis of the client's requirements and made its technical documentation with the team.
- Worked on timelines, deliverables, estimates, and suggestions.
- Mentored trainee developers and provided them the product knowledge.

Untangle Solutions **Rawalpindi, Pakistan**
Internee *June 2017–August 2017*

- Implemented user authentication and authorization using Sentinel (Laravel).
- OAuth Server Implementation in Laravel for API Authentication/Authorization.
- Study/Research on Nested Sets for Hierarchical Data Storage in Laravel.
- Implementation of CRUD Views in Laravel.
- Implementation of an Application Licensing Framework in Laravel.
